

(A great deal of) modern parents | complain that their children don't read much, stubbornly ignoring often the fact that math textbooks are not a page-turner at all. So, the answer is simple - choose a great you need a plural noun here not exactly page turners who should choose? children? parents? book of famous writer Oscar Wilde, an Irish-born genius lived a century or two ago. No, we are by neither talking about his engrossing tales nor his captivating *Dorian Gray*. The best choice for children is *The Canterville Ghost*, with its hilarious plot and gripping narrative. good description

Could you imagine an American diplomat, buying a (real) British castle, with a talking ghost being (who is) depressed by people's ignorance? Ok, a couple of lines about the plot itself. Mr Otis, a staunch Republican, decides to settle in old good England and considers a castle as the best investment good old (to be) (or nothing) tool. There are 4 children in the family, and watching their behaviour is what makes this book witnessing / reading about (special) for teenagers. The youngest of them, the twins, would leave you in stitches on the floor relatable will by their mischievous behavior and - haunting the ghost itself. But this is not why I consider this with story the best choice for modern kids. Actually, the main reason behind my recommendation is that for this book is a kind one. Yes, it teaches you lessons of kindness and tolerance, as we see then the we don't really describe a book as "kind". It's better to say it has positive moral values. plot unfolds and Virginia Otis, a charming fifteen-year-old, befriends the ghost, Simon, and helps him save a soul and rest in peace. I remember (myself) crying while reading because it was the first time then I realised that the world needs light-hearted and open-minded people to be a better that place to live.

Any drawbacks? Well, one can say the language Wilde uses is a way too difficult, the jokes cracked are subtle and requires some IQ to be understood. But still I believe that this book is perfectly suitable for modern children, at least they would see the 19th century England at its highest cultural state, with the balls and the finest manners. you mean "high society balls" and not the other kind.

My final recommendation is to buy a paper copy, as it is impossible to soak in the atmosphere just flicking through the pages at one's gadget. All in all, a must-read. Excellent final comment. on an electronic device

*Your second essay is not quite as strong as the first but has many of the same features: A clear structure, good task achievement and some excellent phrases that are perfect for the style and genre that you have adopted.*

*AS the task requires you to write a personal recommendation, I think the initial paragraph would be better if it included this element of the task. You only mention this quite late in the text and it feels like an after-thought.*

*While some phrases are highly appropriate, there are a few others which don't quite work.*
